Diagram illustrating the front panel assembly components:

- A x1**: A long, narrow rectangular component, likely a light bar or sensor strip.
- C x1**: A square component with a circular protrusion on one side.
- D x1**: A square plate with four elongated slots and a circular cutout on the right side.
- E**: A small, L-shaped component, likely a bracket or fastener.

1. First, use a wrench 3 to unscrew the screws on E to obtain two parts, E1 and E2.

2. The E1 and E2 combinations connect the base through the table hole and tighten the E1.

Note: that perforated installation requires a round hole with a diameter of 10 to 20 to be drilled on the tabletop.

1. First, pre-fix the No. 2 screw to the base by hand.
2. Then tighten the two screws with wrench.
3. Place the base where you need it and tighten the knob

1. Insert the lower arm into the base, and fix the fastening screws on the base of the lower arm with a wrench 3.

1. After sorting out the cables, first clamp the upper arm wire buckle F to make sure the card is in place.

2. Use a wrench 3 to unscrew the lower arm wire buckle screw, remove the wire buckle, arrange the cable, and then install the lower end of the wire buckle in place first, and then fix the screws just unscrewed.

3. When the monitor is tilted automatically, tighten the set screw with wrench 3

4.If the monitor drops, please swing the knob according to the direction “+”
If the monitor rises, please swing the knob according to the direction “-”
