# INSTALLATION WINDOWS 7

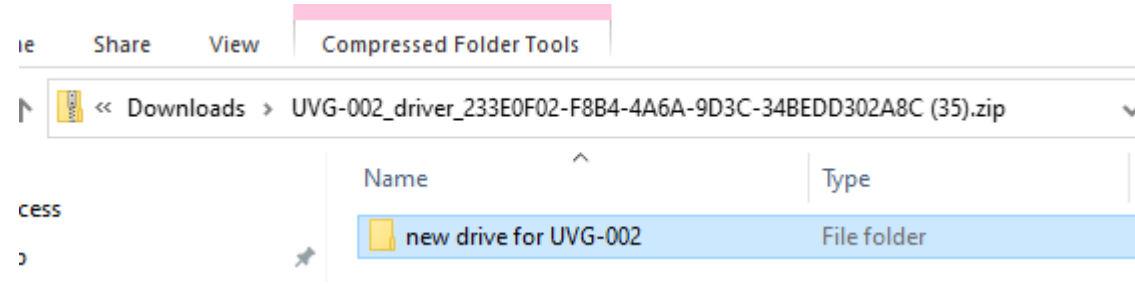

For Windows 7, use the supplied CD-ROM with Honestech AVR.  
If you no longer have a CD player, you can download the program [here](#).

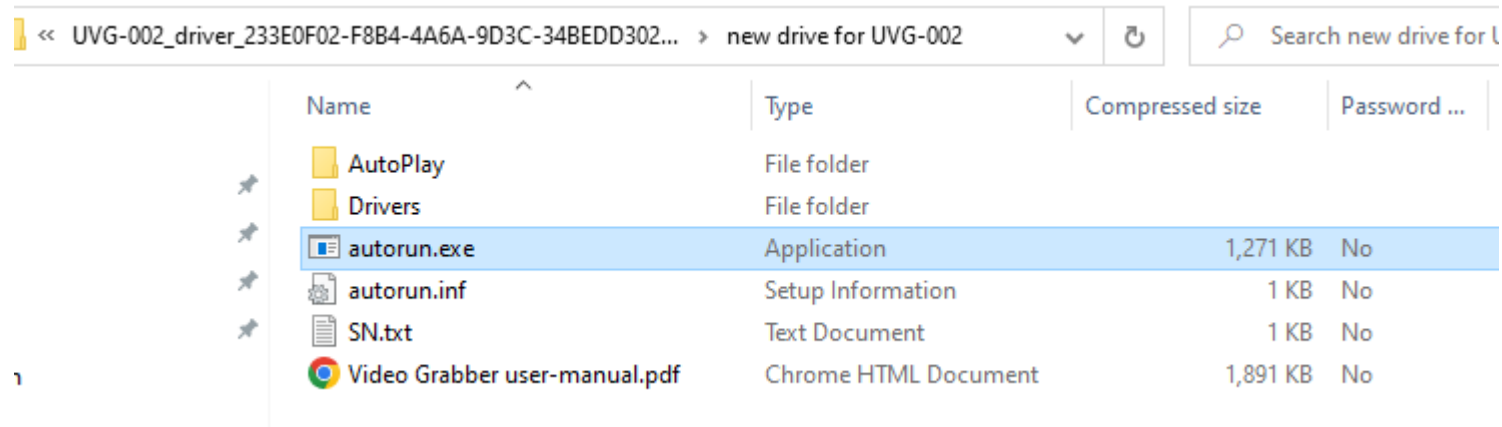

Please note, it is a ZIP file, you must first “unzip” the files before use. If you are not familiar with unzipping, you can find an explanation via [this link](#) from Microsoft.

Double click on new drive for UVG-002

Double click on autorun.exe

Give permission when prompted by Windows. The installation screen should then appear

Restart the PC after installation!

**Serialnumber:** TVR25-NMBGG-HGGGH-362DC-6BMG6

## INSTALLATION WINDOWS 10 AND 11

Windows 10 and 11 automatically recognize the video grabber.  
You don't need to install anything for this. The supplied CD-ROM is only for **Windows 7**.

You do need software.

If you do not have video software yourself, we recommend OBS studio (free).

You can download it at <https://obsproject.com/>

Install OBS studio and then restart the computer.

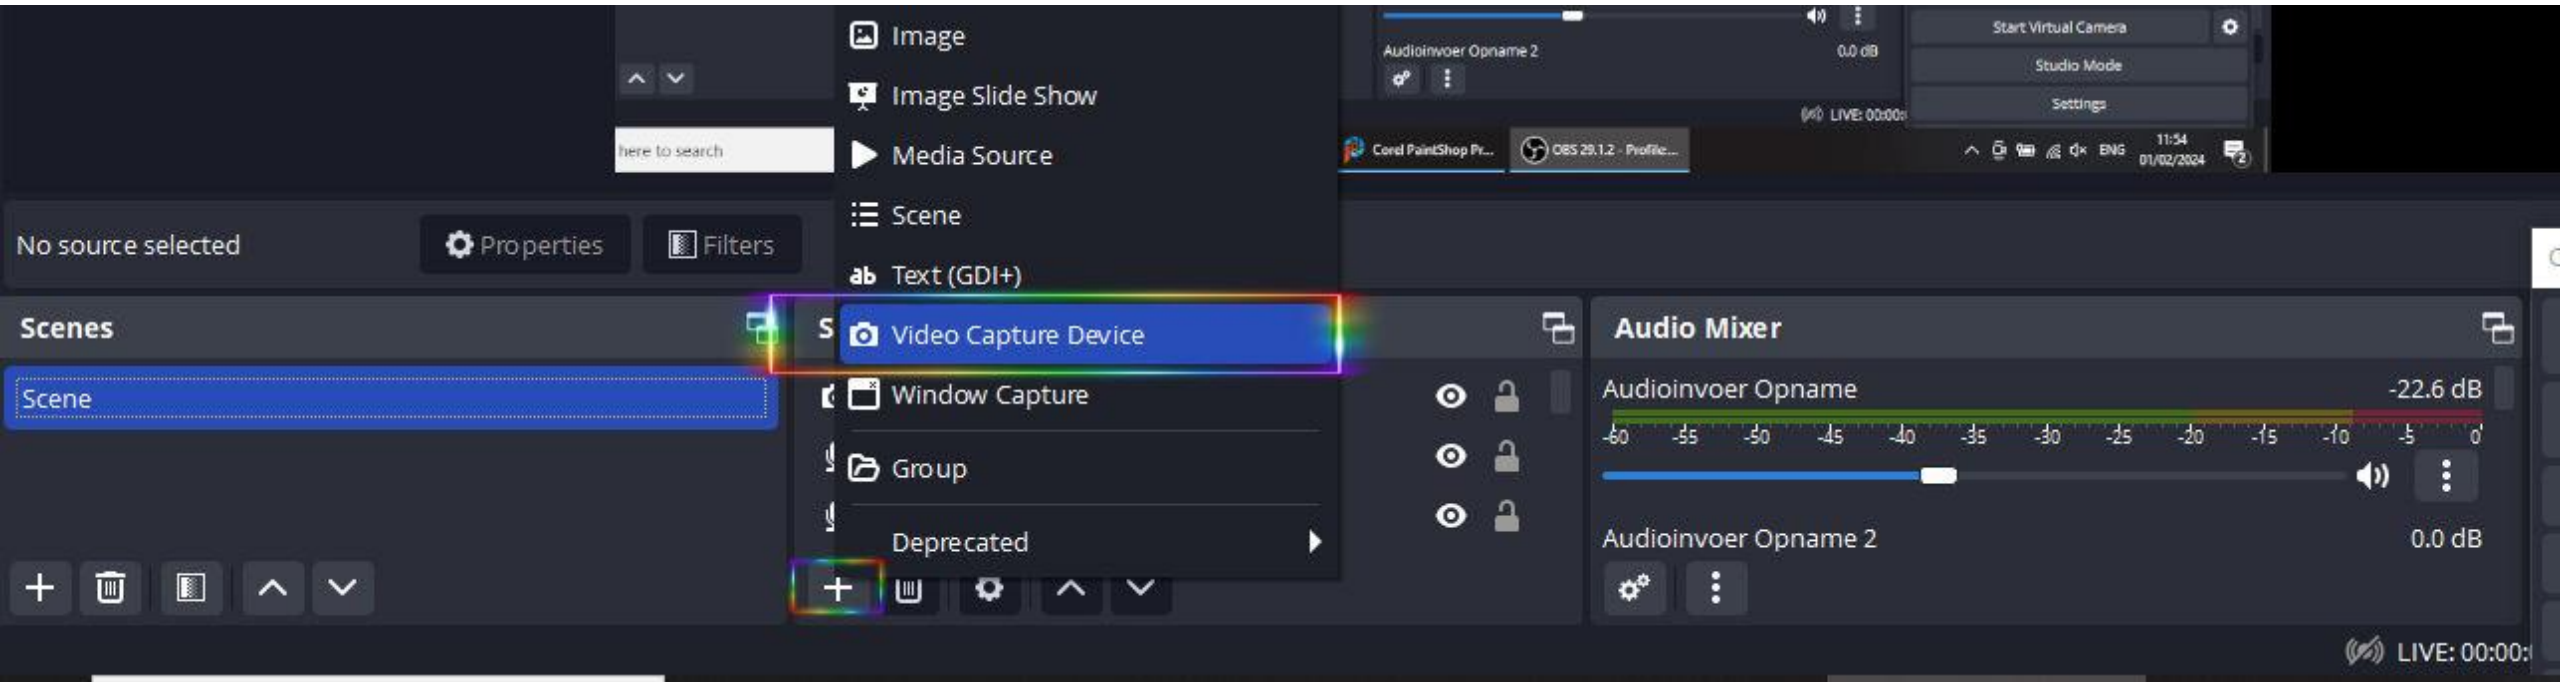

When the computer has restarted, open the OBS app on your computer.

If you are not familiar with such software, we have a short description [here](#).

You can also ask your questions at [www.obsproject.com](http://www.obsproject.com) on their forum or via a Discord chat. There are also many videos on YouTube for using OBS studio.

## SHORT DESCRIPTION OBS STUDIO

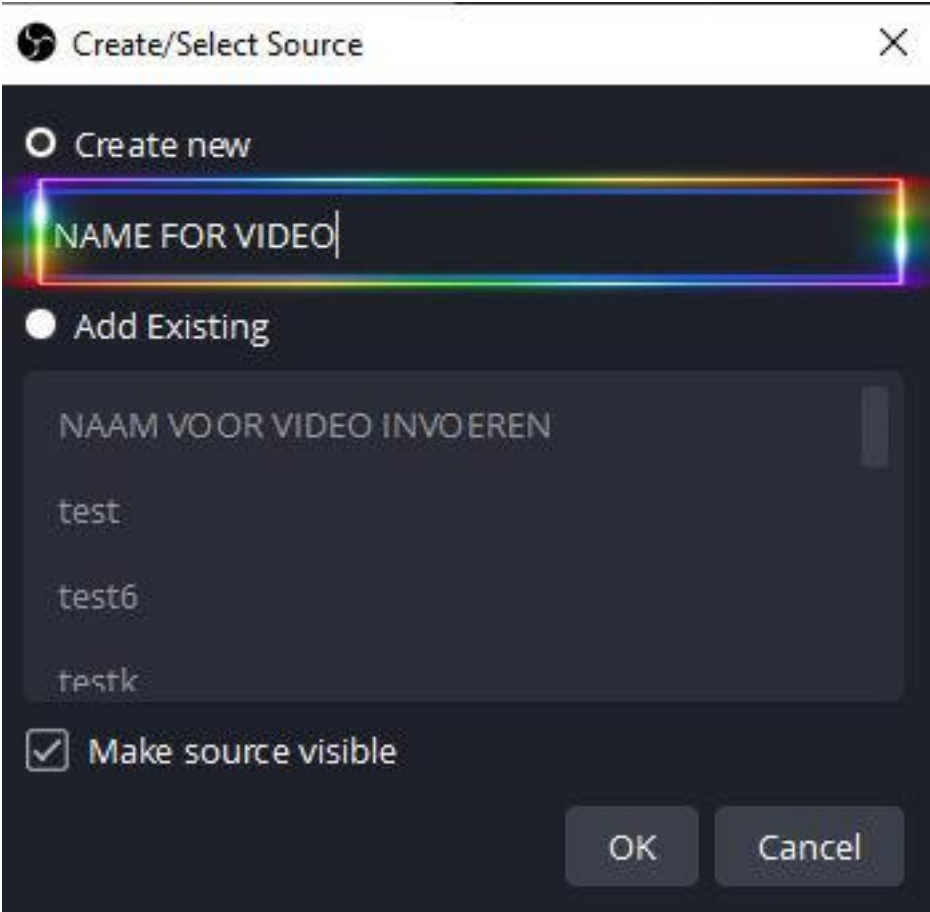

Press + at sources

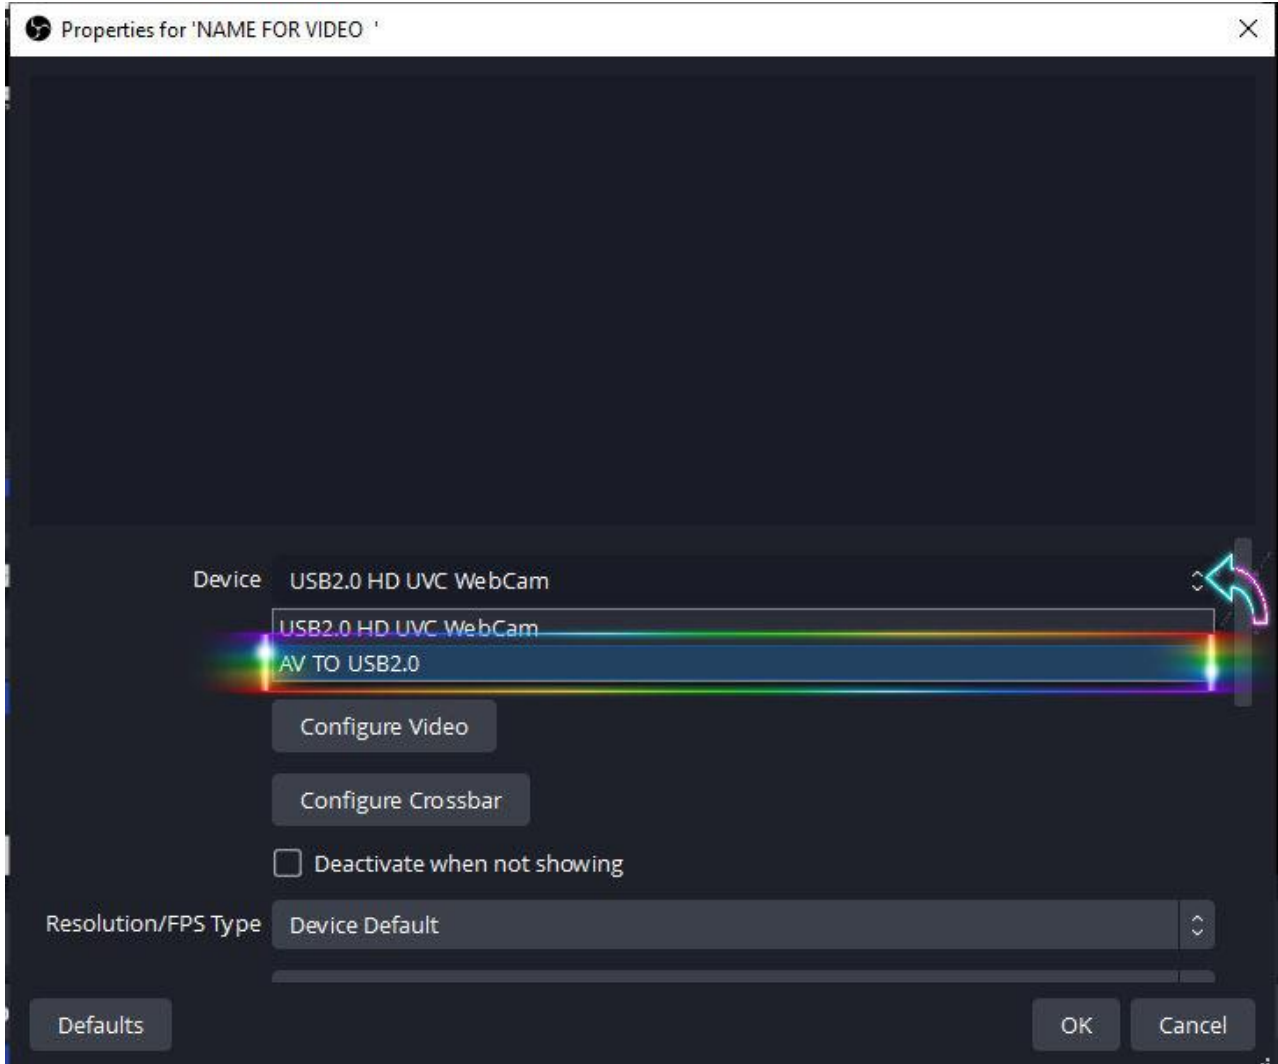

Choose **Video Capture device**

Fill in a **name** for your videofile and click OK

Choose **AV to USB2.0** or **OEM device** and click OK

Set your connected device to **PLAY** and you can start digitizing (record button).  
Everything can be adjusted in OBS according to your wishes in terms of settings.  
Our advice is to first record a small piece to check your image and sound during the recordings.

If OBS sees the grabber as OEM or AV 2.0 USB but you do not see an image, then check your computer whether you have the correct settings in Windows for [permission](#) for the use of camera.

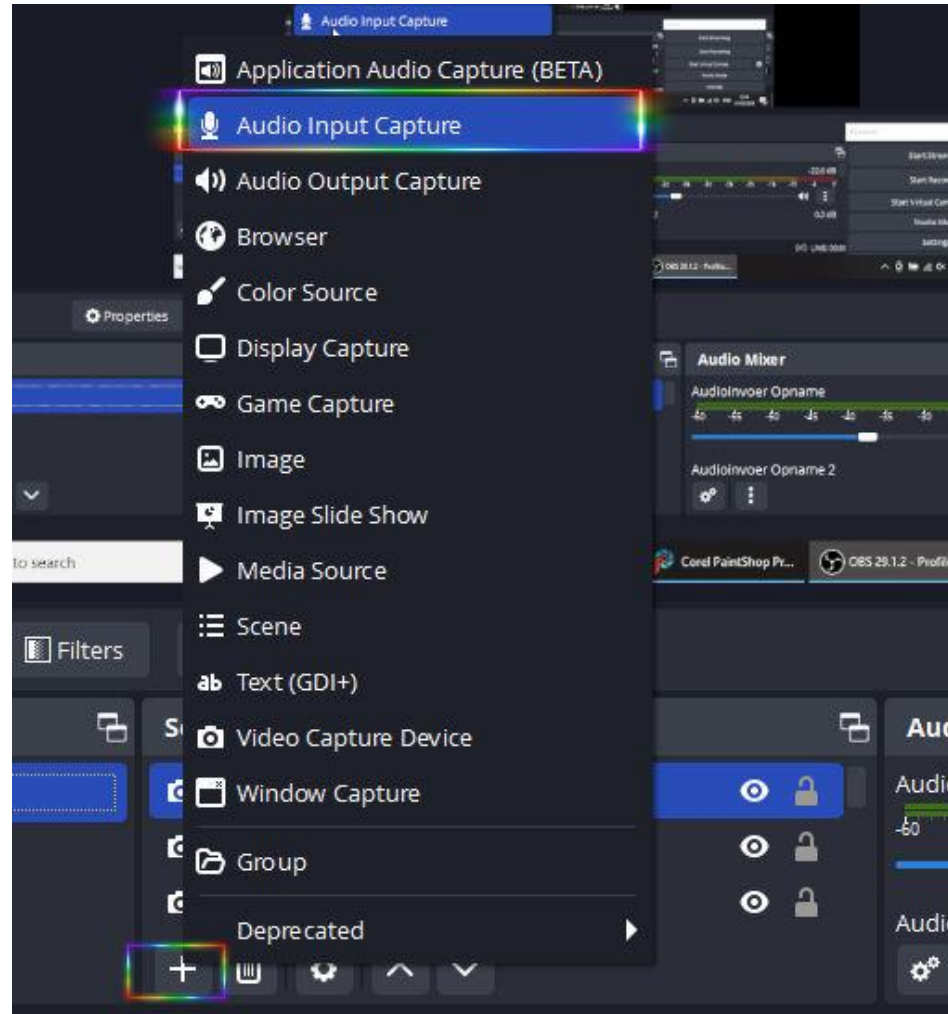

## FREQUENTLY ASKED QUESTIONS

QUESTION	ANSWER
Can I edit videos in OBS?	Yes you can, see instruction video's on Youtube: <a href="#">Add a slideshow</a> <a href="#">Animated background</a> <a href="#">Add text</a> <a href="#">Text effects</a>
OBS sees the video grabber, but I have no image?	Check the settings in your Windows for <a href="#">camera permission</a> .
I have connected a video recorder, but the picture is black and white and/or the sound is poor	Check whether you have only connected the RCA plugs. If you also have the round S-video cable in between, this will cause interference (black/white image and/or poor sound).
I have a Firewire camera, how can I connect it?	You need a <a href="#">separate (not included) cable</a> for this. This may be included with your video camera. You use this cable in the AV OUT jack connection of your camera.
I connected the video recorder with the scart adapter, but OBS does not see it?	Check whether the slider on the scart adapter is set to OUT
I have image, but no sound?	Click here for screenshots sound settings in OBS.
Is there more easy software to use?	You can try NCH. You can download it <a href="#">here</a> .

# SCREENSHOTS OBS STUDIO WITH NO SOUND ON RECORDING

Under **Sources**, press **+** and select **Audio Input Capture**

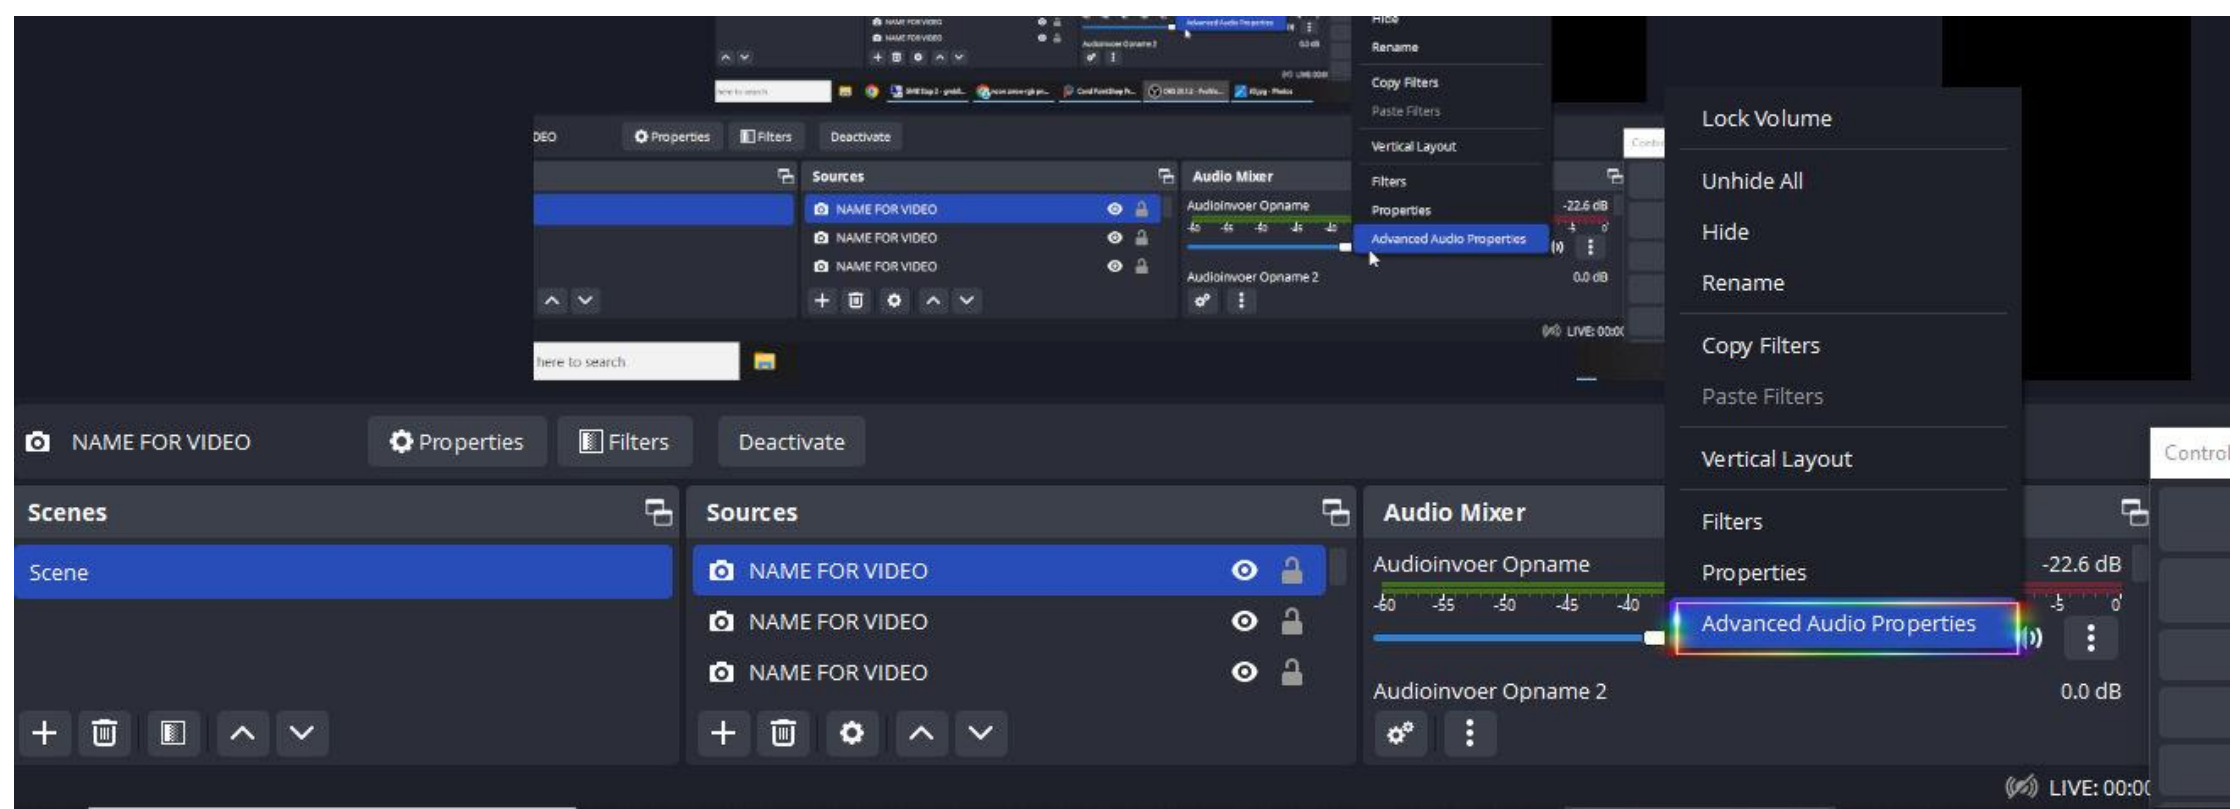

See next page when you still have no audio at your recording

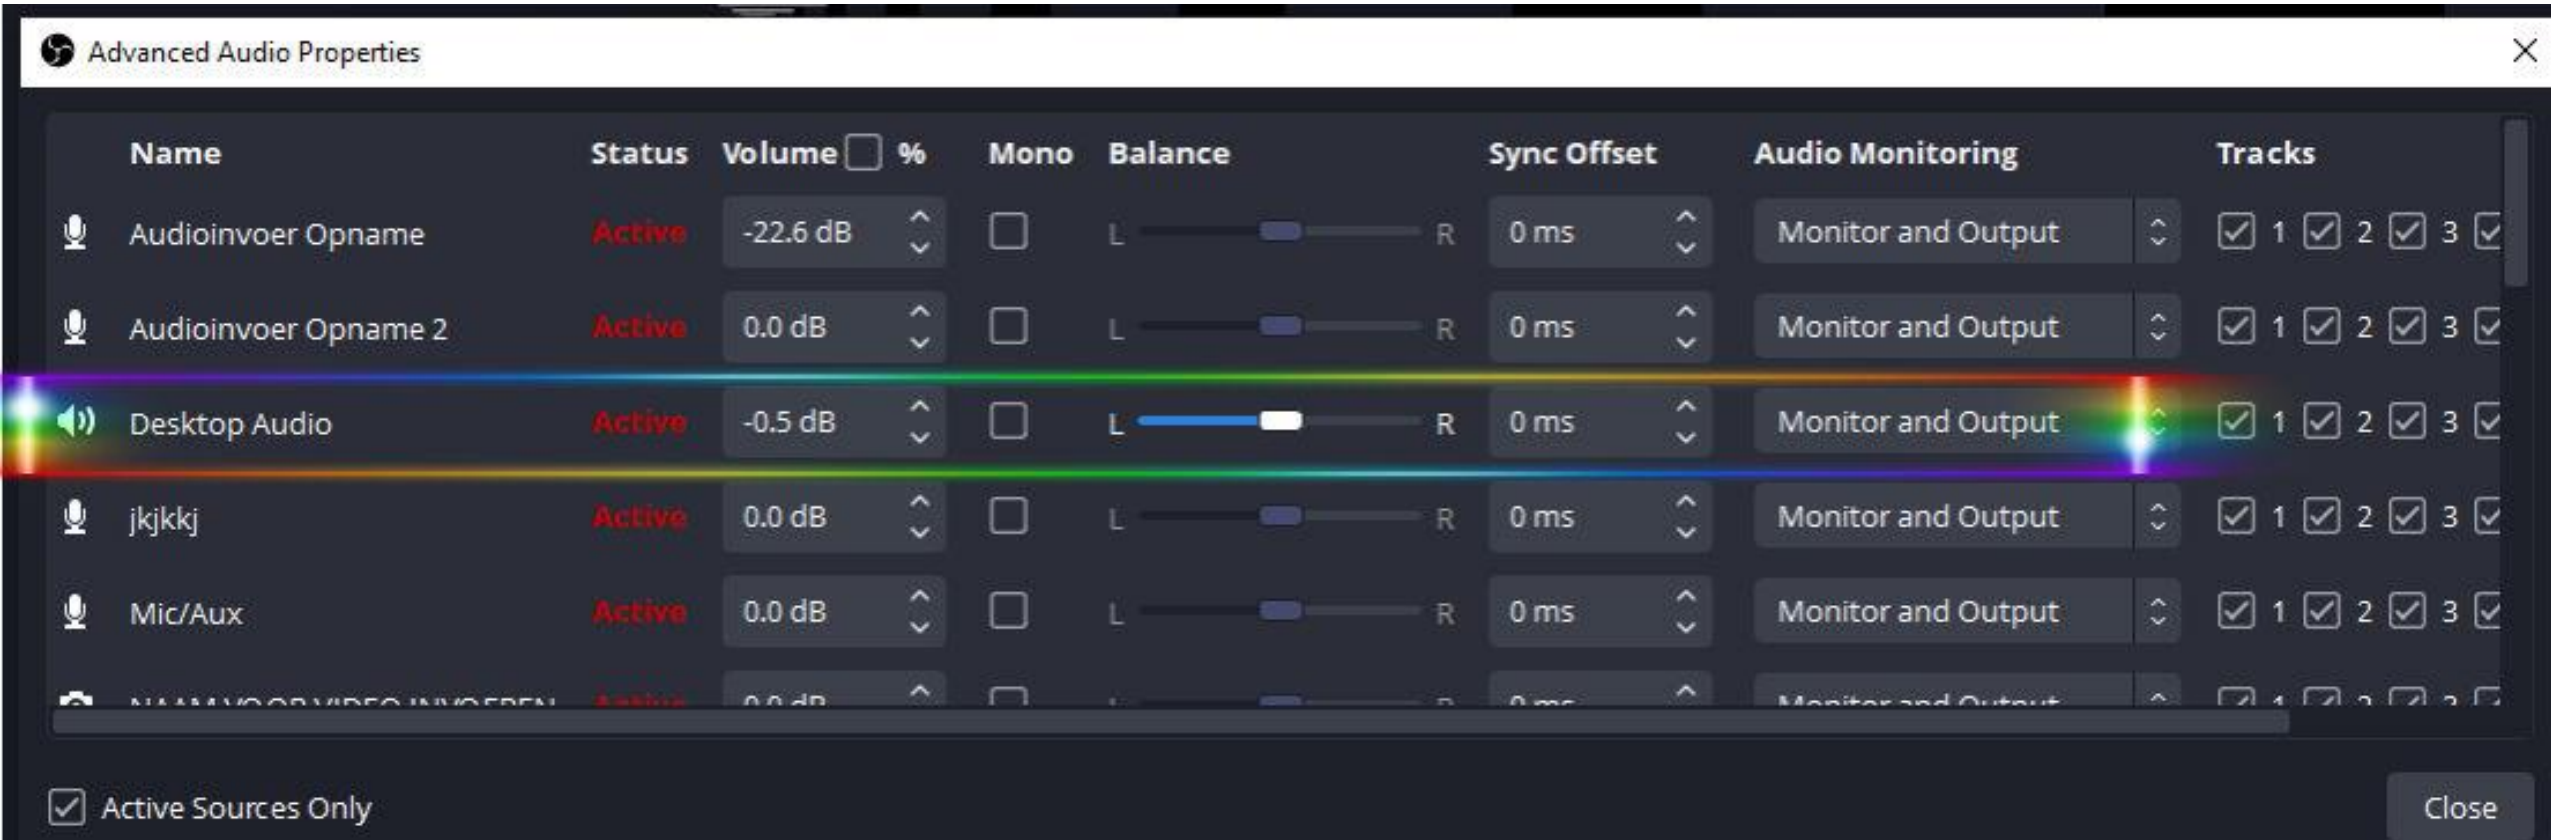

Click with the **rightmousebutton** in the field AUDIOMIXER

Then, in the drop-down menu that appears, select the **Advanced audio properties** option

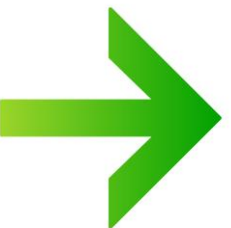

Where the **L-----R slider (active)** is located, set it to **Monitor and Output**.

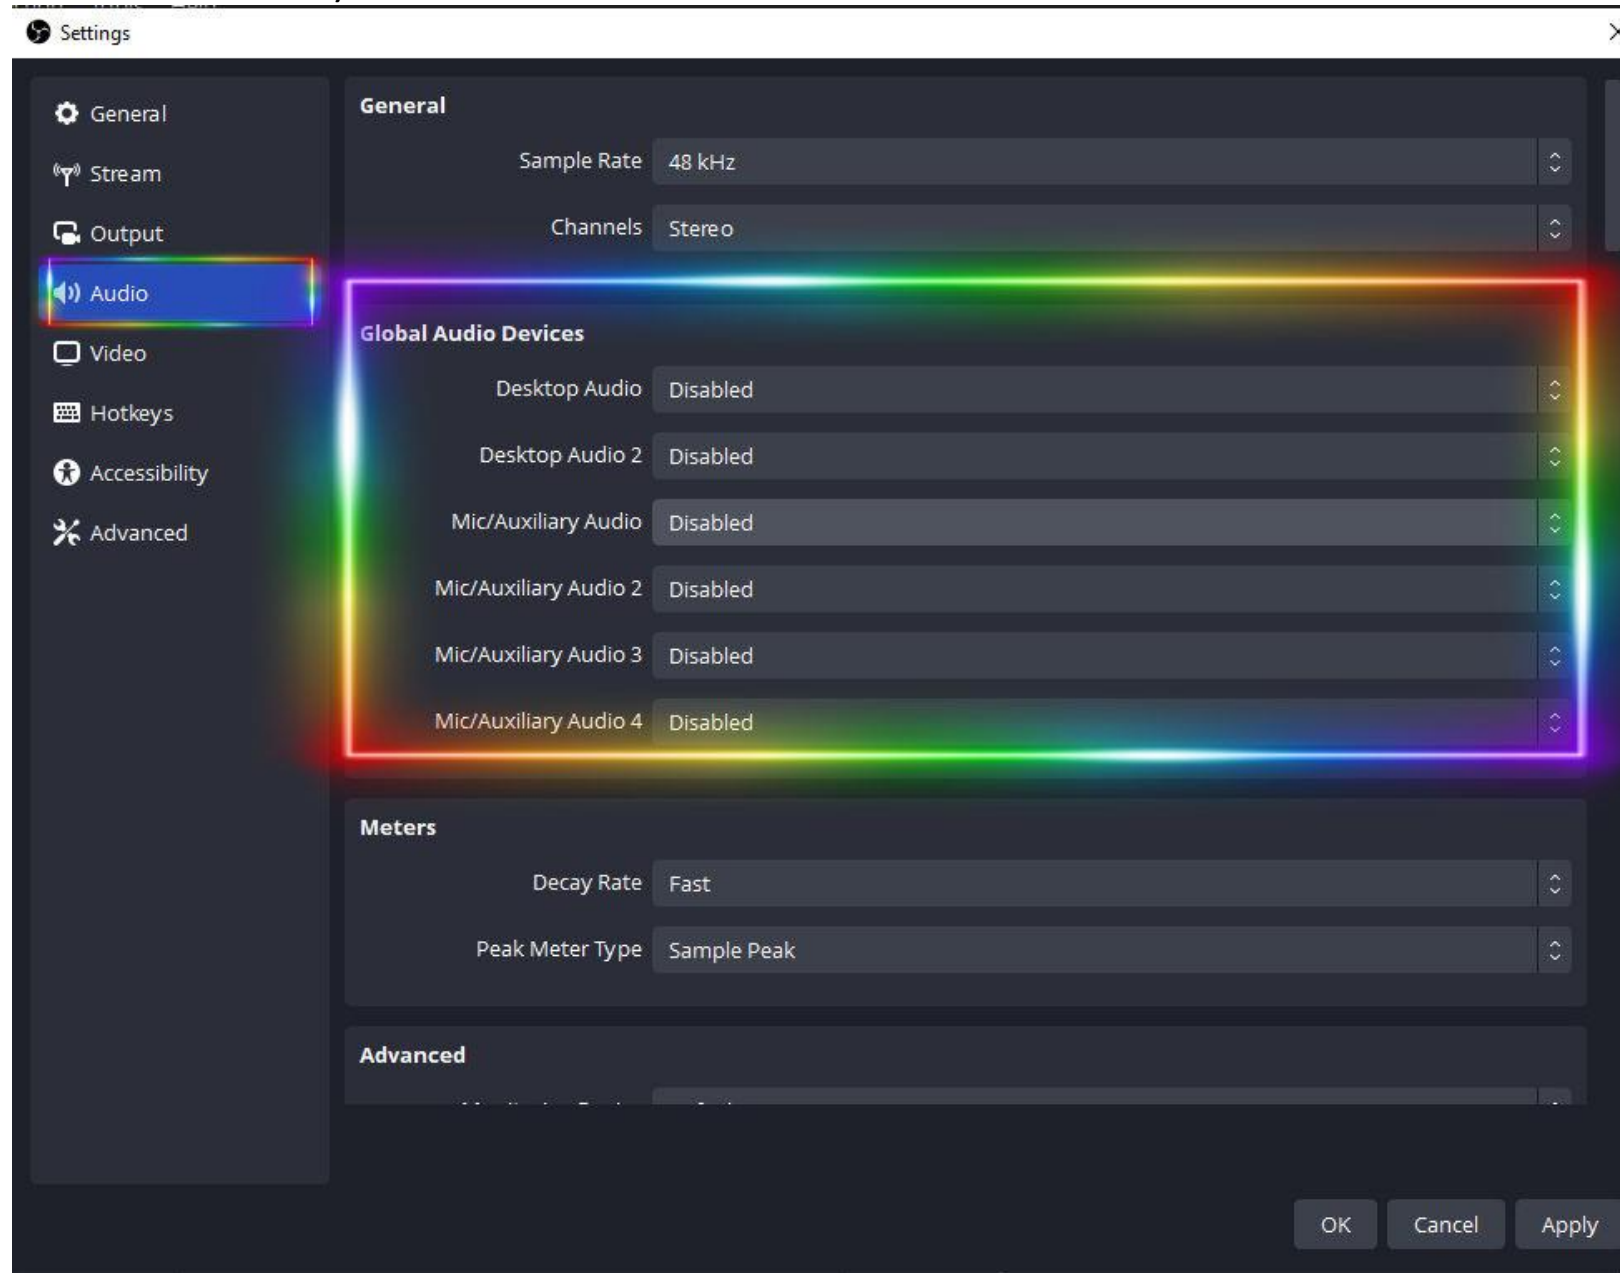

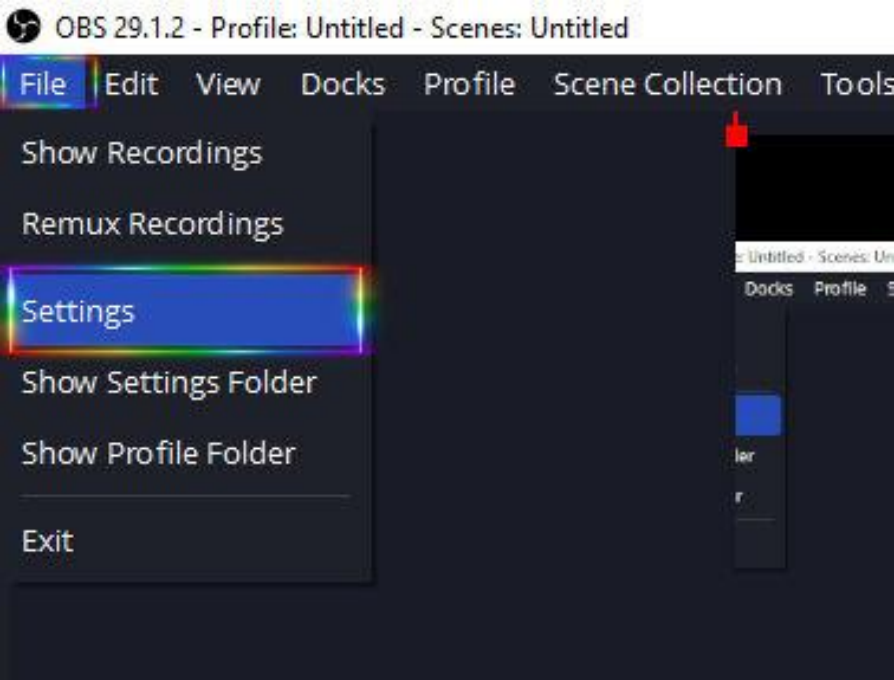

The screenshot shows the 'Advanced Audio Properties' window with a list of audio sources. The 'Desktop Audio' source is highlighted with a rainbow-colored bar. A green arrow points to the 'Monitor and Output' dropdown menu for this source, which is currently set to 'Monitor and Output'.

Name	Status	Volume %	Mono	Balance	Sync Offset	Audio Monitoring	Tracks
Audioinvoer Opname	Active	-22.6 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>
Audioinvoer Opname 2	Active	0.0 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>
 Desktop Audio	Active	-0.5 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>
jkjkkj	Active	0.0 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>
Mic/Aux	Active	0.0 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>
NAMMVCORVIDEONVOCERNA	Active	0.0 dB	<input type="checkbox"/>	L  R	0 ms	Monitor and Output	<input checked="" type="checkbox"/> 1 <input checked="" type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input checked="" type="checkbox"/>

☒ Active Sources Only Close

Also check these settings (**FILE -> SETTINGS**) All Global Audio devices must be **DISABLED**

If you still can't figure it out with the installation of the video grabber, or you don't know exactly how to connect everything on your equipment, please send an email to [helpdesk@gembird.nl](mailto:helpdesk@gembird.nl). We can then send more information if necessary.
